Black Ice Software - June 11, 2015

Add Agent Printers For Routine Tasks

Add Agent Printers during the installation for frequently used, routine tasks

Black Ice Software has released the Printer Driver version 14.37 including **new capabilities to Add Agent Printers during the installation for frequently used, routine tasks,** such as sending the printed document in email, upload to dropbox or print it to a specific file format. The **MSI installers are designed for large scale deployment** and also include the new improvements to add Agent Printers during the installation in Active Directory environments.

Agent Printers enable users to create printers with specific settings for frequently used tasks without having to repeat the printer configuration steps each time. For example, if the user has to email out invoices to the same company then the user can simplify the process by setting up an Agent printer for the company. The user can create as many Agent Printers as necessary.
