Driver Now!

Faster Text Extraction and faster printing are among the most recent improvements in version 15.01 of the Black Ice Printer Driver. Also included in this release are new features for the **Email Sending** and **stability improvements for PDF Printing**.

With **text output generation speeds improved of up to 500%**, the latest Printer Driver significantly reduces the time spent on extracting text from documents which greatly improves document flow through.

The major improvements in the email sending of the Printer Drivers includes a new feature to allow users to **send each page of a document as separate email**. Additional enhancements made to email sending on the latest Printer Driver includes stability improvement for the "Use first email address from page content" feature and general improvements for using Microsoft Outlook for the email sending.

The **enhanced PDF Printing** improves printing of documents with drawn images typically found in medical applications. Furthermore, the new Printer Driver comes with **enhanced PDF Printing**, including improvements for drawing images when printing from certain medical applications.

The complete list of improvements in the latest Printer Driver includes the following:

- Performance improvements for the Text Output
- Added "Send each page as separate email" option to email sending
- Updated PDF DLLs to version 2.9.2.690
- Fixed images appearing black when printing certain documents
- Added warning window to Printer Manager when an evaluation version printer is selected
- Stability improvement for HTTP upload test when "Delete printed document after uploading" is checked
- Changed priority of emails from Low to Normal when silent email sending is enabled
- Performance improvement on some systems when the "Start Application" feature is used
- Stability improvement for the "Use first email address from page content" feature
- "[Read-Only]" text is removed automatically from the document name
- Disabled the Outlook security popup window when sending emails
- Added extended logging to Printer driver MSI installers
- Updated eLicense.dll to version 5.14.206
- Stability improvements for version checking
- Fixed error 37 during registration

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or sales@blackice.com.

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
