The primary focus of release 15.15 of the Printer Driver was **stability and document handling improvements**. These changes were made with the goal of **reducing downtime** and **streamlining the deployment** of the Printer Driver for **System Administrators**.

Some of the changes that were made to accomplish this was **better serial number checking** and for **error handling** for the MSI installers and uninstallers.

The latest release of the Printer Driver also comes with an **improved bitmap merging for PDF documents** and stability **enhancements for dithering when printing** from certain applications.

## The complete list of improvements in the latest BILPManager includes the following:

- Simplified error handling when uninstalling End-User printer drivers
- Stability improvement for error 305 during uninstallation of the End-User printer drivers using the MSI uninstallers
- Improvements for serial number checking for MSI installers
- Stability improvement for MSI uninstallers when aborting the uninstallation
- Updated PDF DLLs to version 2.9.6.696
  - Improved bitmap merging for PDF documents
  - Stability improvement for dithering when printing from certain applications
- Updated Manuals
