Black Ice Software has released the printer driver version 15.53 with an updated HTTPS/HTTP uploader. **With a single click users can now Print, Convert and Upload a document to secure Web Server without any User interaction.**

This was accomplished by allowing the upload process to **save the Username and Password** so the User does not need to enter it every time they are uploading a document.

When the file is uploaded to the Web Server, the Web Service can respond with a URL that will be opened in a browser by the HTTPS/HTTP uploader.

Additionally, extra custom parameters and better error reporting from the HTTPS/HTTP uploader were added.

The HTTPS uploader now also supports HTTPS with TLS 1.2.

Black Ice Software has made additional improvements to the licensing of the printer driver for **VDI (Virtual Desktop Infrastructure)** by **adding transferable licensing**.

For full list of changes, please refer to the version history:

- Changed HTTP uploader window titles to use the printer name
- Added second custom parameter to the HTTP upload feature
- User interface improvements for the Printer Manager Barcode tab (#10723)
- Minor user interface improvements for the Printing Preferences dialog (#10666, #10667, #10668, #10669, #10678)
- Updated eLicense.dll to version 6.03.224
 - Stability improvement for registration on Windows XP (#10955)
 - Added transferable license handling for special installers (#10275)
