Hello NAME,

We are excited to bring you the latest update for the PDF X1 Printer Driver introducing a powerful new feature: the **Print Preview Window** with Overlay Support.

What's New? The PDF X1 Printer Driver now includes a **Preview Window** feature **with overlay** functionality. This enhancement allows you to add overlays to your documents before printing, providing greater customization and control over the output file. Now, you can see the content's position on the printed document before printing.

How to Get It: You can download the latest version of the PDF X1 Printer Driver using the links below:

For 32-bit Windows Desktop systems: [Download Here](#)

For 64-bit Windows Desktop systems: [Download Here](#)

How to Use the Preview Window with Overlay:

1. After installing the new version, you'll find the Preview Window feature on the Printer Manager Page Layout tab.
2. To enable the Preview Window, simply check the "Show Preview Window" option.
3. To configure the overlay, click on the "Preview Overlay Settings" button. Here, you can select and add the overlay image you want to use.
4. If you only want the overlay to appear on the first page, enable the "Show the overlay on the first page only" option.

Experience Enhanced Printing: With the new Preview Window feature, you have the power to customize your documents and add overlays, all within the PDF X1 Printer Driver. This feature is designed to provide you with greater flexibility and control over your printed materials.

We hope you find this new feature valuable for your printing needs. If you have any questions or need assistance, please don't hesitate to reach out to our support team at techsupport@blackice.com or 1(561)-757-4107.

Thank you for choosing Black Ice Software, and we look forward to continuing to provide you with innovative solutions for your document management needs.
