Black Ice Software - October 2, 2014

Printer Driver 14.15 is released!

Improved PDF, HTML and AutoCad printing and improvements for Auto-print Samples!

Black Ice Software has released the Printer Driver version 14.15 including improvements when **printing documents to HTML and PDF file formats with Chinese, Korean and Japanese characters,** and improvements for file name generation when printing PDF documents.

Version 14.15 of the Black Ice Printer Driver includes significant improvements in the API/Resource Toolkit for the **Auto-print Sample applications.** The updated Auto-print Samples include improved printing of AutoCad drawings and printer name handling.

Black Ice Printer Driver version 14.15 also includes improvements to the **Abuto-print Service Sample** to start the conversion automatically when the operating system starts-up. This release also includes updated documentation for the Printer Drivers, Resource Toolkit, MSI Installers and BiCommandLineConverter.

The complete list of improvements in the latest Black Ice Printer Driver include the following:

- Improved profile loading
- **Updated PDF Dlls to version 2.6.2.613**
- Stability improvements when printing documents with Eastern characters to PDF format
- Stability improvements when printing to HTML format
- Improved filename generation when printing PDF documents
- Improved printer name handling in Auto Print C# and VB.NET

Exclude Me

- Samples
- Improvements for printing AutoCad drawings with Auto-print Samples
- Deleting 'Common profiles' folder during uninstall
- The AutoPrint Service sample starts converting documents after the spooler service is started
- In Auto-print samples, when printed the same file twice, in the converted folder the file was overwritten. Changed to create new file with '(1)' name extension
- Updated Printer Driver, Resource Toolkit, BiCommandLineCoverter and MSI documentation
