Black Ice Software - October 16, 2014

Auto-print SDK is released!

Black Ice Software has Announced the release of the Auto-print SDK for Batch Document Conversion.

The Auto-print SDK is now available for developers for Windows Servers or Windows Desktop operating systems. The Auto-print SDK provides a **more cost effective and simpler licensing** mechanism for developers of projects that do not require mass distribution of the printer drivers.

The Auto-print SDK **includes C++, C# and VB.NET batch document converter sample** applications and a **Windows service for batch converters written in C++.**

The feature rich sample applications can be used in production environments without any modification.

The Auto-print SDK **can be utilized for Windows service** based unattended document conversion, creating customized batch converter solutions and **Web Service** based document conversion solutions.

The Auto-print SDK includes detailed documentation to let users and developers take advantage of the new features of the API. For more information about the Auto-print SDK, Samples, Supported operating systems, file formats and key features, please refer to the Auto-print SDK webpage.

✅ **Auto-print SDK key features:**

Supports dozens of file formats - Including PDF, PDF/A, TIFF, FAX, TXT, JPEG, PNG, BMP, HTML, XML and more!

Directory Monitoring - Auto-print Service can monitor the specified directories and process the new documents.

Easy-to-use user interface - Ready to be used in production

environments without any modification.

Detailed logging - To help developers identify and troubleshoot the issues.

Sorting processed documents - Into Failed, Processed and Converted (Output) directories.

Reliability and advanced erroneous document handling - The conversion never stops! The samples can handle erroneous, damaged, password protected and not printable documents.

Support for the Auto-print samples in the OEM printer driver API/RTK is discontinued with printer driver version 14.16.

Free Upgrades and Priority Support

Don't forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases of your software for free with your subscription! Also included with your Subscription is Priority email technical support. For more information call us at +1 (603) 882-7711 Extension 2, or sales@blackice.com.

As a special offer, if your Maintenance Subscription has expired or you did not include the Maintenance Subscription with your original purchase, simply mention this newsletter to renew or add Maintenance retroactively!
