Black Ice Software - October 29, 2015

Printer Driver version 14.43 is released!

Greatly improved searchable vector PDF printing and more!

Black Ice Software has released the Printer Driver version 14.43 including **greatly improved PDF printing.** The improved PDF can generate searchable PDF, even if the source document **uses glyph** indexes instead of characters. The new PDF printing also comes with the capability to simply **copy** the text on the generated PDF document, and paste it in any other text editor, for example Word or Notepad.

The new PDF improvement provides **much better possibilities to convert and archive your documents** in PDF file format, while preserving the capability to effectively search in multiple documents or even directories containing your PDFs.

Version 14.43 of the Black Ice Printer Driver also includes improvements to restore Custom paper sizes when reloading a profile, and improvements for the file format selection on the Save as window, if the configured output directory does not exist.

The complete list of improvements in the latest Black Ice Printer Driver include the following:

- Updated PDF Dlls to version 2.6.6.632
- Improvements for generating searchable PDF documents
- Improvements to allow copy-pasteing unicode text from the generated PDF documents
- Custom paper sizes are now restored when reloading a profile file

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information call us at +1 (561) 757-4107 Extension 2, or email us at sales@blackice.com.

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!
