Black Ice Software's Printer Driver 15.25 is now released with a new feature for adding Text Based Watermark or Stamps to the printed document.

The **Text based Watermark** and **Stamp** feature enables users to create and insert Watermarks or Stamps without first having to generate an image file with the text.

The new text based **Watermark and Stamp** comes with a **visual interface** to provide a **preview** of the Watermark or Stamp on a document.

The **Watermark and Stamp** text can be combined with a variety of built in **system variables** such as Date, User name, Document name, Printer name, etc.

An example of a variable stamp would be “**Approved by John Smith 08/28/2018**”. This stamp can be configured using the stamp text with system variables like “Approved <<USERNAME>> <<PRINTING DATE US>>”.

The **Text font type, size, color, position, and rotation** can be adjusted (configured) based on the users’ requirement for the given Watermark or Stamp.

The complete list of improvements in the latest Printer Driver includes the following:

- Added Text Watermark and Text Stamp features for the Watermark/Stamp Tab of the Printer Drivers
- Stability improvement for handling 32 bit PNG images as watermark
- Added support for Unicode output file names for all formats
- Stability improvement for handling new line characters in content based email sending
- Minor user interface improvements
- Updated Document Imaging DLLs to version 12.61.612
- Added multi-printer support for Printer Driver MSI and InstallShield MSI installers
- Stability improvement for Printer Driver MSI uninstallation when the network card is disabled
- Stability improvement for Printer Driver MSI uninstallation when the internet connection is disabled
- Updated Manuals
