Black Ice Software is proud to announce a NEW file format feature for **Creating Searchable PDFs** when printing non-searchable Faxes or Tiff files to PDF!

The newly added file format name will appear as **“Searchable Compact PDF - OCR (*.pdf)”** under selectable file formats **available only in the PDF and ColorPlus Printer Drivers**. This feature is designed for customers who are using the Printer Driver to **convert Faxes or Tiff Documents to PDF**. Adding improved accessibility and functionality to converted/achieved documents. Version 16.75 is a recommended update to create a searchable PDF.

Another useful aspect for the new searchable file format would be when **printing from Google Chrome, Edge, or Google Docs** where the resulting PDF file would normally be non-searchable and none-selectable. Using the "Searchable Compact PDF - OCR (*.pdf)" format the Printer driver applies Optical Character Recognition (OCR) to the file and converts the image-based text into searchable text and then automatically overlays the text on the image.

The complete list of improvements in the latest Printer Driver includes the following:

DATE: 10-29-2021

Version: 16.75 (revision: 2727)

- Added "Searchable Compact PDF - OCR" file format that lets one create searchable PDF files from non-searchable documents (#14482)
- Updated PDF DLLs to version 3.2.5.739
