The BiBatchConverter is now available with **multithreaded parallell printing**!

10% discount for BiBatchConverter*
Coupon code: **gEMArt6**
Valid through January 31th 2022

Download BiBatchConverter Now!

Black Ice Software is proud to announce a new version of the BiBatchConverter with **exciting new features** to help users convert documents **more quickly and easily than ever before**!

The latest **BiBatchConverter Service** now includes **multi-thread printing**, allowing users to automatically convert multiple documents in **parallel**, providing a much faster and scalable document conversion process. The new BiBatchConverter Service will automatically distribute the documents between multiple printers, providing **high-volume simultaneous printing**, that can convert thousands of documents in a day.

The new **BiBatchConverter Service** now includes a **Web Interface**, allowing Administrators to monitor and configure the document conversion process **on the go** from **any device** including smartphones and tablets.

The latest BiBatchConverter Desktop Application also includes **several new features**, such as remembering the file list to be converted when closing the application, or using the first filename automatically when merging documents.

The latest BiBatchConverter comes with dozens of exciting new features, A few key features include:

- **Simplified Merge Feature**
  Users can enable (or disable) the "Merge Documents" feature directly on the BiBatchConverter User Interface with a single click!

- **New 64-bit version**
  The latest BiBatchConverter comes with separate 32-bit / 64-bit installers, to let customers take advantage of their system resources more efficiently. The 64-bit installer is smaller and offers improved installation speeds, which is vital for larger corporate environments.

The **Printer Driver and Auto-print** engine also have been updated in the latest BiBatchConverter, bringing dozens of improvements, such as improved **password protection detection** in PDF files, improved Page Break character support for document conversion, and new support for **uploading Text Output to a database** using the Upload To Database feature.

The complete list of improvements in the latest BiBatchConverter includes the following:

DATE: 01-04-2022
Version: 5.16 (revision: 766)

- Made error message clearer in case of a connection error during updating the BiBatchConverter (Error 19) (#14748)
- Stability improvements for updating the BiBatchConverter driver files (Error 64) (#14771)

DATE: 12-28-2021
Version: 5.15 (revision: 764)

- Added the "Use a 10-second timer for monitoring the Monitored (Input) folder" option to the BiBatchConverter Service (#14729)
- Updated Printer Driver to version 16.76.2739
  - Added new feature to upload the Text Output to database using the Upload To Database feature (#14724)
  - Improved performance of opening the PDF Settings Font page (#14684)
  - Updated Auto-print to version 16.75.498
  - Added Page Break character support to the Black Ice Print Text helper (BiPrintText.exe) (#14294)
  - Stability improvement for detecting password protection in some PDF files (#14265, #14387, #14397)
  - Stability improvement for printing PDF files with Foxit PDF Reader (#14403)
- Updated BuRegister.dll to version 16.76.2739
- Updated eLicense.dll to version 6.27.294
