**Annotations** by using the  
**Black Ice Printer Driver**

**10% discount for Printer Driver\***

Coupon code: **gEMArt6**

*Valid through June 30th 2023*

**Download the Printer Driver Now!**

**Introducing** the Black Ice Virtual Printer Driver's **powerful annotation feature!** Elevate your document management with enhanced customization, communication, and professionalism. Discover the benefits of adding annotations, headers, and footers to your printed documents. Let's explore this game-changing functionality together!

**Embed Annotations:** The Printer Drivers allow users to embed **custom annotation text on every printed page.** Define your own text and even include the current date and time to effortlessly add important context, remarks, or instructions directly onto your documents. Say goodbye to separate notes and elevate your document management with ease.

- **Custom Formatting:** With the embedded annotation option, users can customize the format of the date & time, ensuring it aligns with their preferred style. Additionally, users have control over the position of the annotation on the page and can even select the font that best suits their needs. These formatting options provide a personalized touch to your documents.
- **User-Specific Annotations:** The Printer Drivers go beyond standard annotations by allowing users to include **user-specific** information, such as the **person's username, computer name,**

**IP address**, and more. By utilizing predefined fields and environment variables, managers can automatically incorporate relevant details into the annotations, making document tracking and identification effortless.

- **Enabling Annotations:** Simply open the Black Ice Printer Manager > Select Printing Preferences... > Annotation-Header-Footer Tab > Check to Enable Annotations.

**Header and Footer:** The Printer Drivers also offer the option to **add headers and footers to the printed documents**. These features are invaluable for providing essential background information and maintaining a record of document flow. You can include user-specific details like the username, print date, and time in the header and footer, enhancing document management and organization.

- **Customization and Positioning:** The Header and Footer configuration offers extensive customization options. Users can define the text, which can include ASCII characters and variable placeholders for printing information. Moreover, users have control over the position of the header and footer on the page, allowing users to align them as per your requirements. Font customization further enhances the visual appeal and readability of the added text.
- **Seamless Preview and Editing:** The Virtual Printer Driver provides a preview of the header and footer configurations, allowing users to easily visualize the final layout before printing. This preview feature ensures that your annotations, headers, and footers are precisely positioned and formatted as intended, saving you time and resources.
- **Enabling the Header and Footer:** Simply open the Black Ice Printer Manager > Select Printing Preferences... > Annotation-Header-Footer Tab > Check to Enable Header and Enable Footer.

Take advantage of the Black Ice Virtual Printer Driver's annotation capabilities to enhance collaboration, communication, tracking, and document customization. Experience the convenience and professionalism it brings to your printed documents.

If you have any questions or need assistance, our dedicated support team is always here to help you.

A list of some recent improvements to the Printer Driver can be found below:

DATE : 05-23-2023

Version : 17.34 (revision: 3017)

- Added option to place a watermark or stamp to the top left, top right, bottom left or bottom right corner of the pages (#16467)
- Removed page number suffix from the filename of the first printed page when printing into single-page formats (#16464)
- Improved palette handling for 8-bit color and grayscale images (#16462)
- Stability improvement for the 256-bit PDF encryption. In some cases Adobe Reader was unable to open the encrypted document (#16373)
