Valid through March 31th 2024

Download the Printer Driver Now!

Dear [Customer Name],

We are thrilled to announce the release of the latest version of Black Ice Printer Driver, version 17.60, which introduces the groundbreaking feature of multi-threaded printing. This advancement revolutionizes the printing experience, offering unparalleled speed, efficiency, and convenience for users across the board.

The Power of Multi-Threaded Printing:

Multi-threaded printing brings a host of advantages to users, providing a seamless and expedited printing process. With this feature, every user on the system sees one printer, eliminating the need for multiple printer installations and simplifying the printing workflow.

Enhanced Speed and Efficiency:

Desktop and server environments alike stand to benefit from multi-threaded printing. In traditional printing setups, users may experience delays as each document is converted one at a time by the printer driver. However, with multi-threaded printing, documents are converted simultaneously, or in parallel, significantly reducing wait times and frustration.

Consider a scenario where multiple users need to print or convert documents simultaneously. With parallel printing, each print job is processed simultaneously, ensuring that users with varying document sizes do not have to wait for their turn in the queue. This not only saves time but also enhances productivity and user satisfaction.

Streamlined Printer Sharing:

Printer sharing becomes more efficient with multi-threaded printing. When a printer is shared from a server to multiple users, there is no longer a need to wait for other users' print jobs to be completed. Each print job is processed independently, allowing for smoother and more seamless printing operations.

Empowering Agent (Task) Printers:

Furthermore, multi-threaded printing extends its benefits to Agent printers, allowing them to take advantage of parallel processing. While Agent printers typically operate sequentially, with one driver and one port for all print jobs, multi-threaded printing enables simultaneous processing for increased efficiency and performance.

Upgrade to Black Ice Printer Driver Version 17.60 Today:

Experience the power of multi-threaded printing and unlock new levels of speed, efficiency, and convenience in your printing workflows. Upgrade to Black Ice Printer Driver version 17.60 today and see the difference for yourself.

Thank you for choosing Black Ice Software as your trusted partner in printing solutions. We remain committed to providing innovative technologies that enhance your user experience and drive productivity.

A list of some recent improvements to the Printer Driver can be found below:

DATE: 03-11-2024

Version: 17.60 (revision: 3130)

- The End-User Licensed Printer Drivers use 3 threads by default (#17177)
- Added license information and registration button for Agent Printers in the Printer Manager (#16639)
- Renamed "Searchable Compact PDF" file format to "Searchable PDF" (#17205)

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or sales@blackice.com.

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
