Black Ice Software - May 29, 2013

Document Converter
Printer Drivers version 13.65 is released!

The Black Ice Printer Drivers version 13.65 includes improved content based barcode printing. When the new "Use Embedded Text" option is enabled, the Printer Driver will recognize special character sequences in the printed text to extract the information on the barcode.

The recognized character sequences all start with two '#' characters. Most of these 'commands' will cause the driver to remove or alter the printed text and write it in the printed barcode. The recognized command sequences are as follows:

##~~Test1~~
'Test1' will be removed and printed on the barcode.

##**Test2=Test3**
'Test2' will be changed to 'Test3', and the characters after the equation mark will be printed on the barcode.

##**Test4**
'Test4' will be printed on the document and also written to the printed barcode.

For Example;

```
SUBTOTAL:                    19.30,
##**TOTAL:                   19.30,**
DEBIT   TEND:                19.30,
DEBIT CASH BACK:             0.00,
TOTAL DEBIT PURCHASE:        19.30,
##~~CHANGE DUE:              0.00,~~

##**08/11/12, 19:18:31=08/11/2012**
```

After Printing

```
SUBTOTAL:                    19.30,
TOTAL:                       19.30,
DEBIT   TEND:                19.30,
DEBIT CASH BACK:             0.00,
TOTAL DEBIT PURCHASE:        19.30,

08/11/2012
```

(The barcode; *TOTAL: 19.30, CHANGE DUE: 0.00, 08/11/2012*)
