Black Ice Software - January 20, 2015

## Printer Driver 14.19 is released!

**Significant improvements in the installations, Start Application Feature, Message Interface and Auto-print Samples!**

Black Ice Software has released the Printer Driver 14.19 including improvements to the **installation and uninstallation**, especially when an older version of the Black Ice Printer Driver was installed on the system.

Version 14.19 of the Black Ice Printer Driver includes stability improvements for the **Generate output in memory** option, for the Start Application feature with Start Before Printing and **Start After Printing option**, when using the Document Name, Group Filename and Output Filename parameters.

The latest release of the Black Ice Printer Driver API/Resource Toolkit includes, **major improvements in the Auto-print samples**. The new Auto-print samples also include improved printable area detection, capability to configure the printing timeout, password protection detection and improvements when printing PDF documents with embedded JavaScript.

Version 14.19 of the Black Ice Printer Driver API/Resource Toolkit also includes, **improved Message Interface** for printer driver and **Message Capture samples with Abort messages**. The Abort message appears if the printing was interrupted to help Developers and Administrators to track the document conversion.

**The complete list of improvements in the latest Black Ice Printer Driver and API/Resource Toolkit include the following:**

- Improvements for the InstallShield and MSI Uninstaller to remove the driver files and user settings from the registry
- Improvements for the InstallShield and MSI Installers to overwrite old printer driver files on the system
- Minor improvements in the user interface of the Installers
