Content Based File Naming is now available in the Printer Driver!

10% discount for Printer Driver*

Coupon code: **gEMArt6**

Valid through February 28th 2021

Download the Printer Driver Now!

Black Ice Software announces release of the **Printer Driver** version 16.40 with the greatly anticipated **document content based file naming!**

The **content based file naming** has **far reaching implications** on many fields such as accounting, billing, invoicing, medical applications, and database indexing where the document file name **MUST** reflect critical information such as invoice number, or purchase order number in the document name such as "ACM invoice 00899654.PDF".

The **content based file naming** enables users to control indexing of their documents based on the actual document name; most commonly used are invoice number, purchase order or patient

number, all without additional manual processing of the document.

User selectable Content Filtering of the **document name** comes in handy when printing from applications that place the application name front of document name such as Microsoft Word or Crystal Reports. By default these are **automatically filtered** out some commonly used application document name such as Microsoft Word or Crystal Report. **User** can **configure** specific document name **filtering** for other **applications** names.

The **SMTP Email Sender** module includes **many new** features **similar** to MS **Outlook**. The body of the emails text can now be **easily edited** emails. The email **text** characteristic **can be modified** or selected such as **font's type** and **size** from a simple drop down window. Buttons have also been added to allow email **text** to be **Bold, Italic or Underlined**. The SMTP email sender will **remember** you **last edit selection** just like **Outlook** for future use.

One of the **usability** improvements **added** to customers is to **display Maintenance/Support** contract **expiration** date information **on the Print Manager** General Tab.

The complete list of improvements in the latest Printer Driver includes the following:

DATE: 02-01-2021

Version: 16.40 (revision: 2628)

- Redesigned email sending window, added text formatting features (#13095)
- Minor user interface improvement for the "Exact filename from the registry" and "Exact filename from the INI file" filename generation options (#13579)
- Added option to the Redirect Printing feature to use the default printer of the user (#13610)
- Stability improvements for saving in the Printer Manager, if the email sending is set to SMTP, but the SMTP settings are not configured (#13014, #13635)
- Improved PDF output, fixed upside down images or pages in some rare cases (#13616)
- Updated PDF DLLs to version 3.1.4.723
- Updated manuals

DATE: 01-12-2021
