Download the Printer Driver Now!

Black Ice Software has released **new Photo quality filters (dithering)** to **Improve FAX resolution** and **produce** high-quality and **high-resolution Black & White images for printing** in the latest Printer Drivers!

For any customers using the **Printer Driver for faxing**, it is **highly recommended to update to version 16.72**.

Black Ice Software added several new filtering (dithering) methods such as; **Floyd-Steinberg High Quality**, **Jarvis-Judice-Ninke high Quality**, and **Ordered Clustered dithering** methods. In addition, we added a new **Graphic Fax Resolution "204x196 DPI Fine Fax Downscaled"**.

For Faxing, the default Photo Quality (dithering) settings in the Black Ice Printer Driver provide a

good balance between file size and quality for an average documents mainly consisting of black text on white background with a few images (logos) here and there.

However, when printing **Medical documents** with **very small** fonts, such as 5 point gray text for archiving or faxing, the default dithering settings might **not** produce **legible/readable fax**. The solution is the "204x196 DPI Fine Fax Downscaled" resolution, with Floyd-Steinberg High Quality, and Intensity: 50.

The complete list of improvements in the latest Printer Driver includes the following:

DATE : 10-08-2021

Version : 16.72 (revision: 2722)

- Automatically optimizing the Photo Quality (Dithering) settings for faxing when the "Create Faxable Image" option is used. (#14479)
- Added "204x196 DPI Fine Fax Downscaled" option, to make small text in certain documents bolder for faxing. (#14479)

### Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or [sales@blackice.com](mailto:sales@blackice.com).

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

\*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
