NEW ! IMPACT COLORFAX 5.0!

Impact ColorFax is a multi functional fax system which is designed for users who need a simple but effective PC color fax solution. Impact ColorFax is a PC based stand-alone color fax software application designed to run on Windows NT 4.0/Windows 2000/XP and Windows 95/98/ME. It is also compatible with HP Color Fax technology. Impact ColorFax differentiates itself by offering color faxing that is not available from any other fax software vendors. It still has conventional features such as a simple and familiar user interface, single-port faxing, and black and white faxing. The following list

Impact ColorFax 5.0

contains some of the main capabilities:

Features:

- Receiving color or black and white faxes
- Sending color or black and white faxes
- Integrated Drag and Drop Printing™ tech-

nology for easy document conversion into faxable format.

- Cover Page Generator and Editor: Create your own custom cover page with logos.

New features of Impact ColorFax 5.0

The new version of Impact ColorFax introduces many new features and innovations.

New printer drivers: Version 5.0 of Impact ColorFax comes with the new generation of the Black Ice printer drivers which allow the conversion of any printable document into a faxable format. The new printer driver converts the documents faster and more reliably than any other previous versions. Also, the new printer driver makes Impact ColorFax fully compatible with Windows XP Home and Professional Edition.

New image editing features: The new version of Impact ColorFax comes with many new features in the field of image processing. If your received fax contains 'noise' (black dots) they can be easily removed using the *Clean Image* feature.

Use the *Paper Cut* feature to cut the received fax in two by a horizontal line with one click of the mouse or the *Split* or *Combine* to split or merge multi-page TIFF files.

Rubber stamp annotation: Use the new *rubber stamp* feature to quickly place notes on your faxes.

Integrated Drag and Drop Printing™ technology: Never has it been simpler to fax your documents!

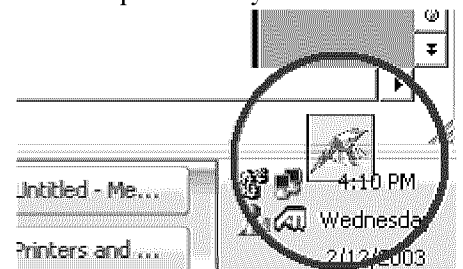

Figure 3

Just drag your Word, Excel, Adobe PDF, etc. documents onto the ColorFax floating window (Figure 3.) and they will be faxed out!

Automated conversion of your documents into faxes.

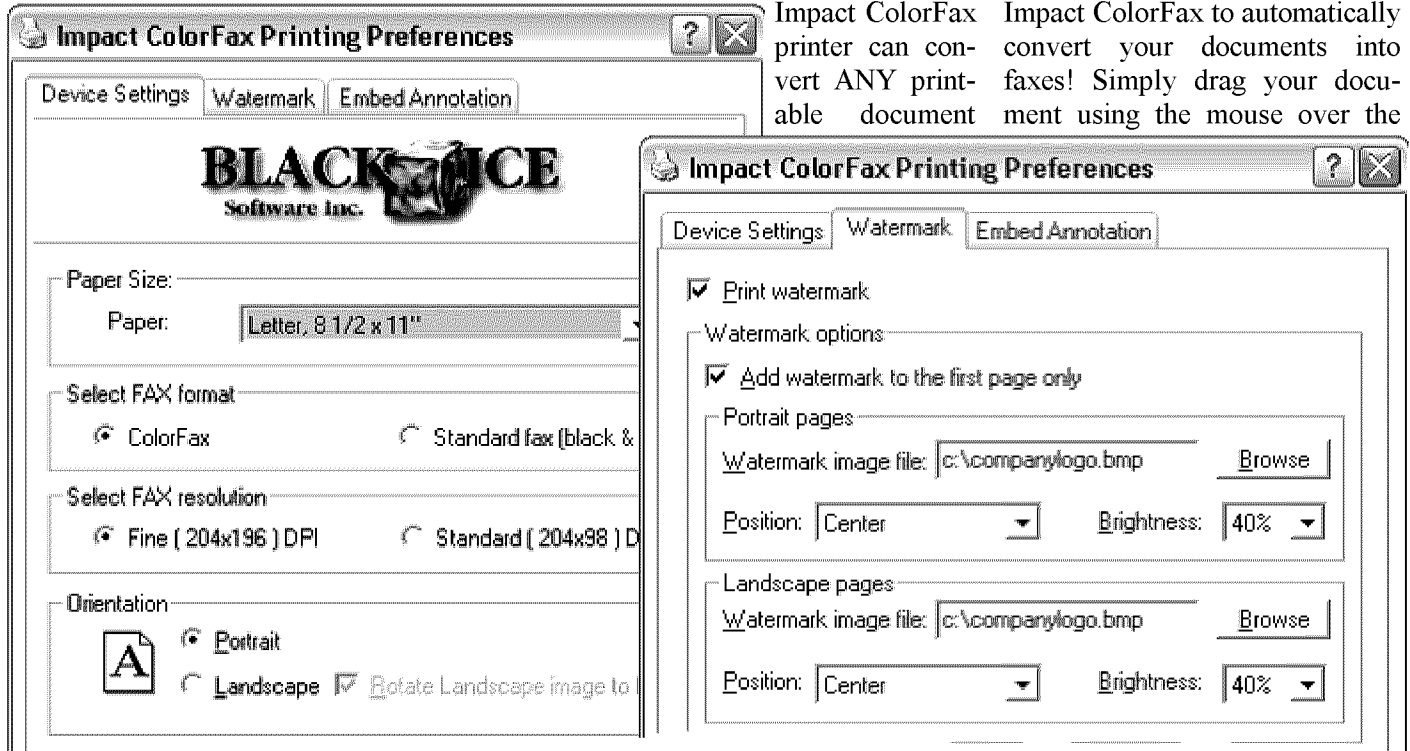

Your everyday document such as Word documents, Excel spreadsheets, Adobe PDF documents, etc. cannot be faxed

printer will convert your documents into images and will launch the ColorFax application to send the fax. The Impact ColorFax

automatically.

3. Use the Drag and Drop Printing™ technology integrated in Impact ColorFax to automatically convert your documents into faxes! Simply drag your document using the mouse over the

Impact ColorFax printer can convert ANY printable document

directly. In order to fax such documents, the documents needs to be converted into a faxable format.

Select the document you would like to fax and Impact ColorFax will automatically convert your document into faxable format! Any Microsoft Word, Excel, Power Point, WordPad, Notepad text, HTML or Adobe PDF document will be converted to fax by Impact ColorFax

ColorFax floating window and ColorFax will convert them into faxes. Any Microsoft Word, Excel, Power Point, WordPad, Notepad text, HTML or Adobe PDF document will be converted to fax by Impact Colorfax automatically.

Delphi samples for the Printer Driver Resource Toolkit.

The Resource Toolkit version 7.56 for the XP/ Win2000 / NT and Terminal Server printer drivers comes with new sample applications written in Borland Delphi. The new samples help Delphi programmers integrate the Black Ice printer drivers with their applications. The samples come with full source code written in Delphi 5.0.

The first sample shows how to read and modify the printer

settings. Each printer setting can be retrieved and modified individually.

The second sample shows how to capture the printer driver messages. The printer driver messages are windows messages sent by the driver at every startdoc, startpage, endpage, enddoc event.

The third sample shows how to read and use the contents of the group file generated by the printer driver.
