Black Ice Software - September 25, 2012

Linear PDF for Fast Web Viewing

Black Ice Software has released the Virtual ColorPlus and PDF Printer Drivers version 13.40 with Linear PDF output for faster Web Viewing.

For slow internet connections and large PDF files, viewing the PDF documents from a web server can be very time-consuming. The Black Ice Printer Drivers allow you to convert your documents to a linearized PDF.

What does this mean? A linearized PDF file is structured in a way that allows the first page of the document to be displayed in a browser before the entire file is downloaded from the web server. This kind of page-at-a-time downloading is especially important with large documents that can take a long time to download from the server. [Read more...](#)

- Improved printing from Internet Explorer 9 with Adobe Reader
- Improved printing using RAW data type
- Fixed 1kb PDF problem when "Enable advanced printing"

EXCLUDE ME

If you no longer wish to receive this email [please click here](#).
