

Black Ice Tiff Viewer

For Windows 10/8/7/Vista/XP SP3 (32 and 64bit)

The Tiff Viewer and Browser Plug-In allows browsers to view any TIFF image on the Internet or to open and view TIFF, JPEG, and a variety of additional image format files on the local computer. Images can be manipulated, split, printed and processed in a variety of ways using the many features provided in the Tiff Viewer. The Tiff Viewer can upload images and TIFF document files to SharePoint. You can easily add files to a SharePoint server for collaboration, central storage, and tracking file change within an organization. The SharePoint feature can be accessed by using either the Tiff Viewer or the Tiff Viewer Browser Plug-in.

Some of the key features of the Tiff Viewer and Browser Plug-In include:

- TIFF Viewer is able to display legacy MODI annotations (Microsoft Office Document Imaging replacement)
- Google Chrome and Microsoft Edge Browser Extension
- TIFF Viewer is able to display WANG annotations
- German, French and Spanish language versions are available
- Continuous scrolling and multi-page view is added
- Add Signatures or Initials to documents
- Automatically open fillable forms with Form Filler
- View, print, annotate and edit TIFF, JPEG and a variety of image types.
- TIFF Viewer Transferable licenses
- Place Comment annotations to anywhere in the document!
- Print TIFF documents silently with Tiff Viewer from command line!

Scan, batch scan in documents and letters for easy distribution and storage.
